

# HORTUS

## Sustainability fact check

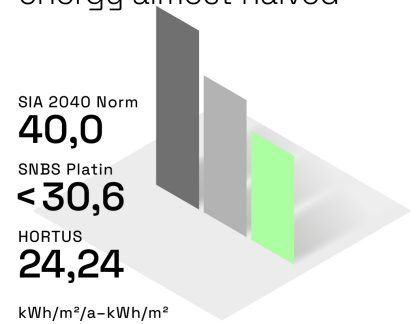

Half the energy consumption in operation

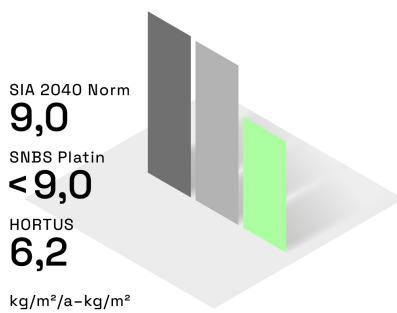

Without greenhouse gases in operation

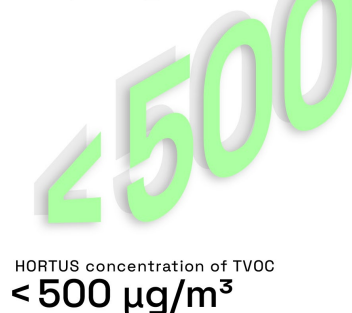

Grey construction energy almost halved

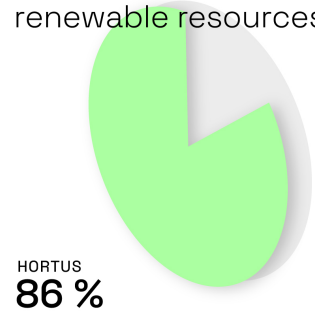

Greenhouse gases reduced by one third

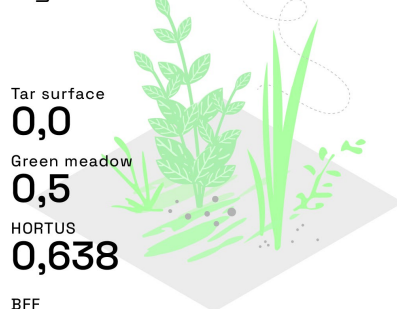

Above-average indoor air quality

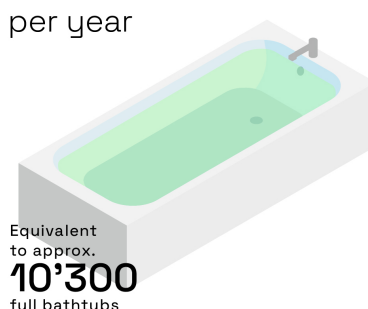

Proportion of building materials from renewable resources

More biodiversity than a green meadow

approx. 1'855 m³ of treated rainwater per year

Comparison of standards

- **SIA 2040**  
Target value requirements for sustainable building of the Swiss Society of Engineers and Architects' Association
- **SNBS Platin**  
Quality certificate for Holistic and Sustainable Building Standard
- **HORTUS**
